Solar flux, A & K indices by year

Clearly, sunspot numbers are not what they were. On the other hand, we didn't have the sky-high A index we had in 2015. QSO totals have been flat since 2014 but participation is increasing. We won't argue with that!

In score listings, a checkmark $\sqrt{\text{denotes a certificate winner}}$.

Notes from the logchecker

Digital mode operators: please carefully check your logging software. We received two logs which had negative numbers where the other station's QTH should have been. (I suspect the numbers were PSK IMD attenuation figures) One of these operators was able to reconstruct the QTH information. The other one couldn't & I had to use his log as a checklog.

We only received five paper logs this year, and nearly all of the emailed logs were of proper Cabrillo format. We had a bit of trouble with a couple of ADIF-format logs. These logs didn't contain the mailing address of the operator or the QTH from which he operated. Please avoid using ADIF if possible. If you must use ADIF, please include your mailing address and your county in your email.

If those are the biggest problems we're having, we're doing pretty well!

Soapbox

AB1YD:

I really enjoyed the non-stop action, especially after the recent poor band conditions. Looking forward to next year!

AC4G

Traveled to family place in Clay County. Had to erect some wire antennas. First, began with a vertical with radials. Did not work as the FT-950 would not tune, so happened to bring 4:1 balun which was added. Thank goodness would tune lower 40m band and lower 40m SSB band sgement. Decided after much wasted time trying to prune & tune, to stick with CW in the contest.

Since it would not tune 80m or other bands, I decided to pull out of my bag of center insulators, ladder line, and rope with end insulators in attempt to erect another antenna to tune other bands for other points. Even about 2 hours into contest had something to tune 80m with high SWR and decent SWR on 20m. After a struggle getting ladderline dipole working around and over some electric lines, I was off in the contest.

I wanted to activate Clay County since it seemed somewhat rare except for the rovers & mobiles driving thru. All and all, I had much fun working against the clock and driving 3.5 hours from my home QTH in Lincoln County to active this one from my family vacation house.

Thanks all who pulled my weak signal out. Located at the bottom of a hollar surrounded by hills at least 300 ft high all around.

In the end, on 20m I QSO'd West Coast (CA, WA, MT), on 40/80 the East Coast (Northeast, Virginia and Carolinas down to FL) to Louisiana, Texas, Arizona and the mid-West. Was not able to QSO all TN Counties via CW. 73.

Bruce

(Unfortunately, we weren't able to activate all counties this year. No entrant has yet worked them all. Let's try to change that in 2017!)

K1AUS:

Very poor conditions. A lot of QSB. The only band I heard any Tennessee stations was on 20 meters. (KIAUS is in Montana)

K1GU:

Operating from the Great Smoky Mountains National Park, NPOTA NP26. (Blount Co.); Operating from Ft. Loudoun State Historical Park (Monroe Co.); Operating from Melton Hill Dam, Clinton Engineer Works, Manhattan Project, NPOTA HP50. (Roane Co.)

K9GDF:

Antenna is rain gutter and downspouts.

K9IL

Like to see the Tennessee mobile stations sign as rovers. Since we don't search & pounce much it'd be nice to be able to spot the mobiles. For me limited time as we went to a fireworks display. Always a fun contest.

KD5ILA

Thanks for the great QSO Party. I really enjoyed it. Worked all stations heard. All contacts were made using 160M Delta Loop antenna at 10 feet. I want to thank all operators for allowing me to be part of their logs.

K ISMA

Good party, but heavy QRN and no mobiles heard. (in Texas)

KN4Y:

Mostly a 40-meter QSO party, got power back after Hurricane Hermine in time for the fun.

KY4L:

This operation was also an National Parks on the Air activation of the Manhattan Project National Historical Park (HP50) from the Children's Museum of Oak Ridge, an original Manhattan Project structure.

N2WN

Meh. 20 was dead overall, went there to make sure K9YC got the county, he was the only multiple repeat. Activity seemed sparse, it was a pretty day for a drive and less humid than last year. No issues this year, Murphy was on holiday. VE3KZ and VE9AA were the only "DX". VE3KZ was the only one to work me in all seven, K9YC made five. Thanks for the Qs. Ran a KX3 into a Hustler. 72..

N4ARO:

Using my old TS-830S and a collection of wires in the trees but still had fun handing out Washington county. Performance nothing to brag about this year. Band conditions pretty poor.

NC6K

Not much time to participate, and conditions were pretty awful. Many of the TN stations bailed from 20 to 40 M early on, so us West Coast stations had no one to work.

I suggest a longer contest period (24 hours?) so those of us on the opposite coast can have some time to work stations on 80 and 40 M.

W1END:

Rig was FTdx5000 and Butternut HF6V all-band vertical. Pleased to find so much activity.

W4KW

I tried to give the West Coast some extra attention on 20. Hopefully TN participation was up this year. Probable cost me some points by not going to 40 sooner, but that's the path I chose. Thanks for all ur help and dedication.

W4WFC

This is my first submission to a contest ever! I have been a ham since 1988 and have operated several contests but have never submitted a log. I had a blast! I did not get started until 5 PM CDT because of my grandson's birthday party, but I had 176 total contacts, 528 QSO Points, 32 Multipliers, for 16,896 Total Score. Hopefully, the attached file is in the correct Cabrillo format. Will look forward to next year! Thanks!

(it was in correct format. Thanks, and glad we could be your first submitted log!)

W5JR:

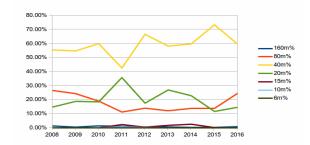

First time to operate the Flex away from home. The radio was in GA (home) while I was in TX (former home).

W8JPF:

Too close for 20m, 40 shut down early and my antenna for 80 is not very efficient. Found some good signals from TN and had fun. Tnx es GL to all.

WN8VIX:

This is my first TN QSO Party after moving here about 12 years ago. It certainly was a challenge and I wish I had participated before now. Thank you for sponsoring this event and I look forward to next year's.

QSOs by band by year

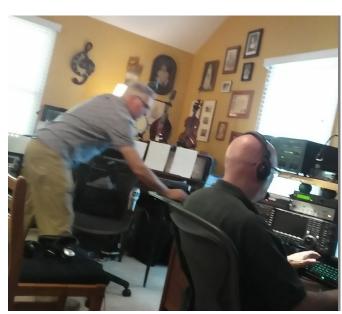

Roughly 85% of QSOs this year were made on 40 and 80 meters. As you might note in the Soapbox above, that's a problem for many West Coast stations. In September, the sun goes down at 7:15 in San Francisco. The Tennessee QSO Party ends at 8:00. That's not much time for decent 40 meter conditions, and 80 is pretty much out of the question. More activity on 20 meters would be appreciated by many out-of-state operators, and by our DX brethren.

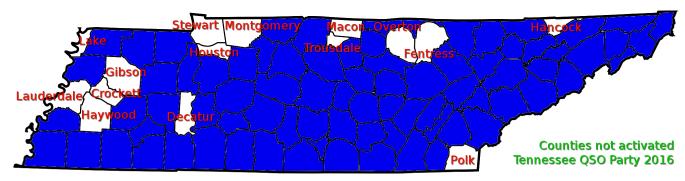

KD5ILA, Arkansas

The K4RO antenna system

WF7T & K4RO operating K4TCG

We came fifteen counties short of activating them all this year.

The 2017 Tennessee QSO Party will be on Sunday, September 3rd. See you there!
