The total number of submitted QSOs was similar to last year. With fair propagation, we met our annual requirement, which is to have fun!

There was a total of 31,221 contacts from all participants, with CW QSOs leading the contacts this year with 18,460. Phone contacts were close behind with 12,741. There were a small number of RTTY QSOs this year of 20.

We have included numerous breakdowns by different categories in our annual report, plus a complete breakdown by In-State Contacts and Out-Of-State Contacts.

We hope all participants had fun and made plenty of contacts. Check out the breakdowns below. This year we have a variety of methods for reporting. We have something for those that like numbers, and something for those that like graphs.

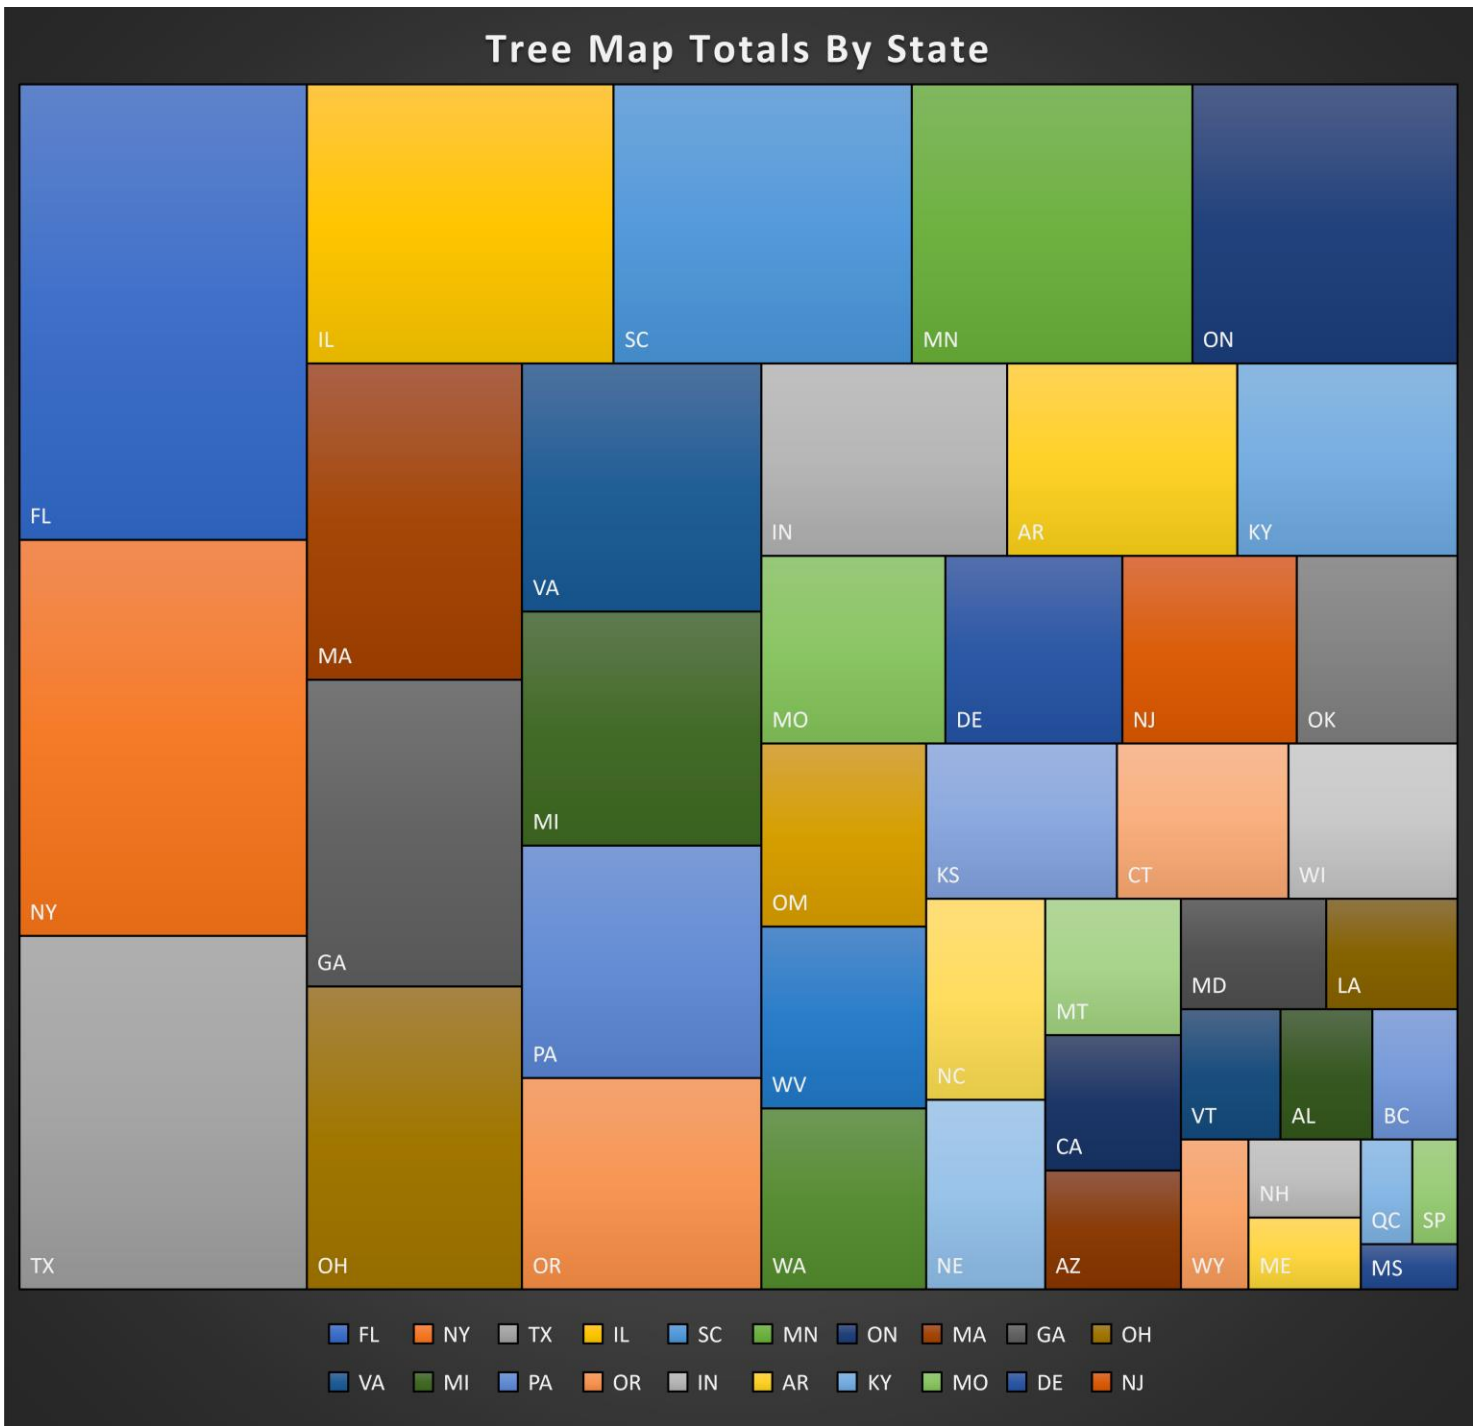

CW	18,460
PH	12,741
RTTY	20
Total	31,221

Scroll through the reports below to see breakdowns and results in all categories.

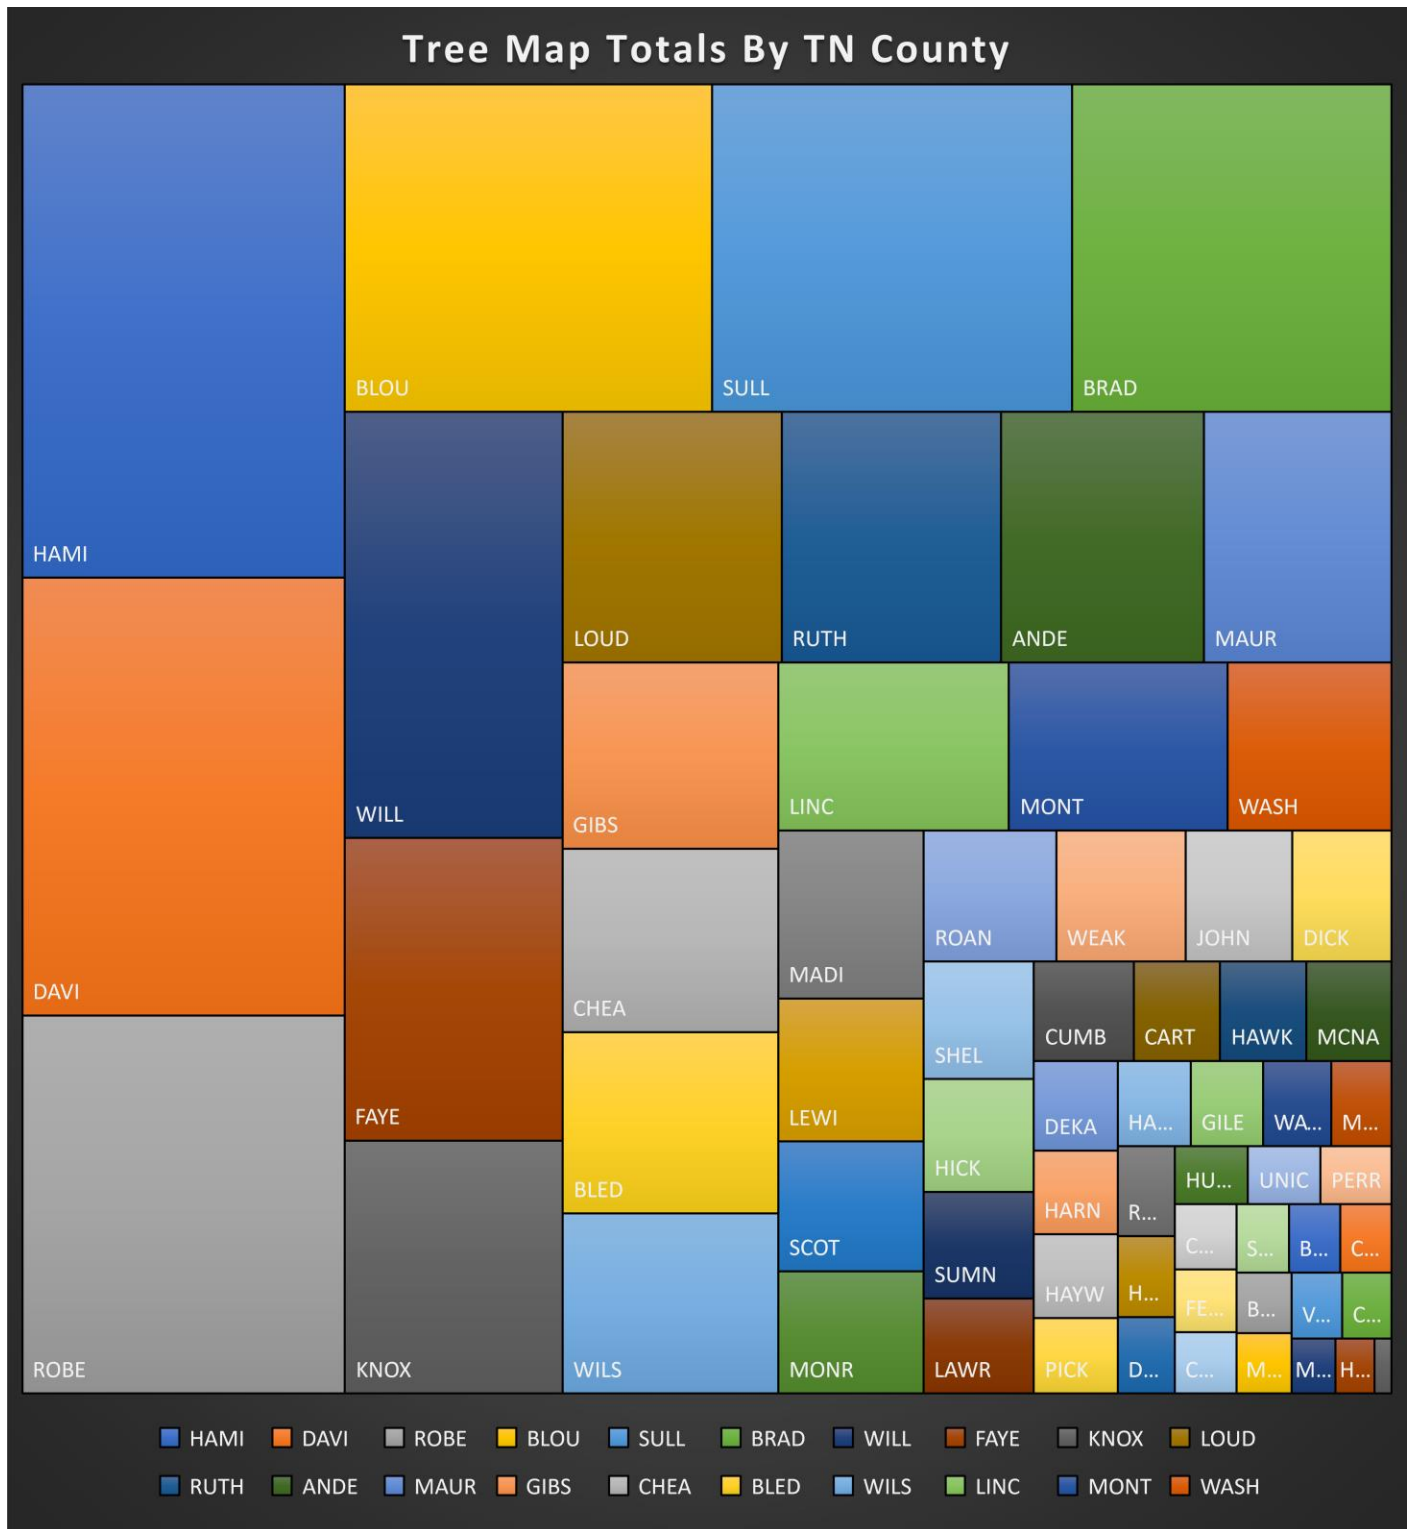

QSOs by State

Our first new graph is a Tree Map for QSOs by State (less Tennessee). The larger the square, the more contacts from that state. Florida made a great showing, followed by New York and Texas.

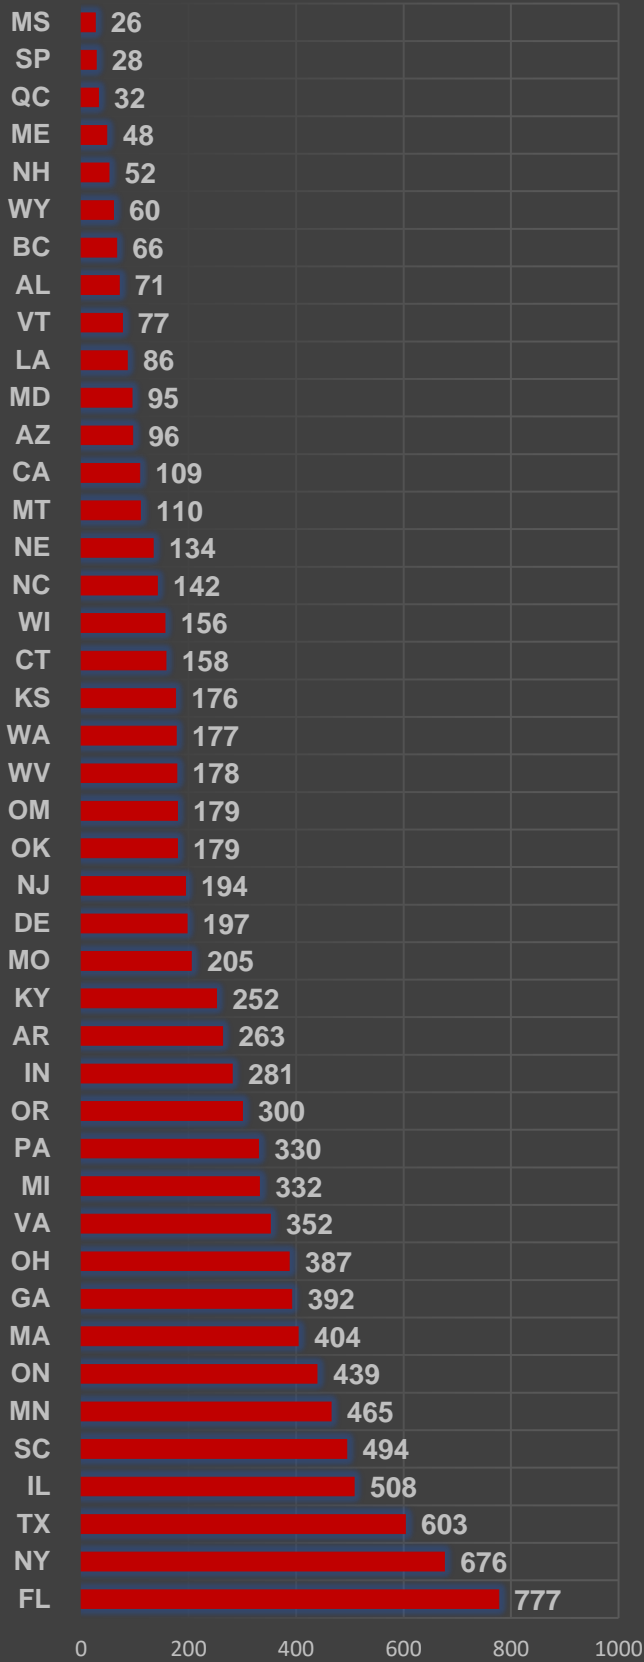

QSOs by Tennessee County

Our next new graph is another Tree Map of QSOs by Tennessee Counties. The larger the square, the higher the number of contacts from that county. Hamilton County leads the pack, followed by Davidson and Robertson.

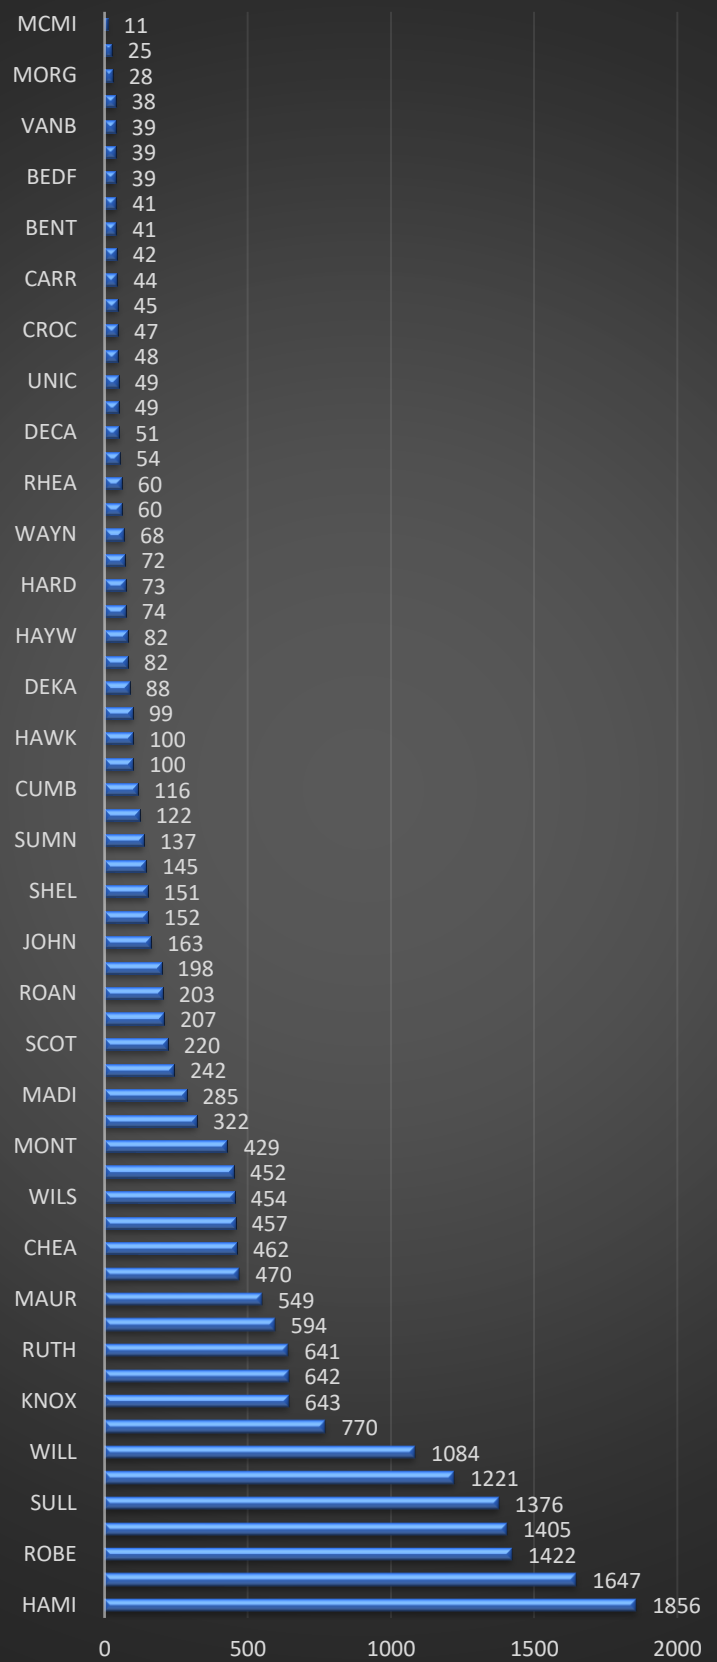

And we have the numbers breakdowns by State and TN Counties
