# TNQP Cabrillo Template
2020-10-12

The Tennessee QSO Party will make every effort to use all logs submitted. We almost always succeed. It will be easier for us if your log is in the Cabrillo format and conforms to the following template. Please note that other file formats (including ADIF) frequently lack important information, such as your callsign & address!

If you used software that won't create a Cabrillo file (or you used paper logging), there's an online Cabrillo file generator. Navigate to http://www.b4h.net/cabforms/tnqp_cab3.php for more information.

Notes:
1. All times are UTC.
2. The ARRL-SECTION: tag is used to identify whether you're in Tennessee or not. If you are, please enter **TN**. If you aren't, please enter a valid ARRL section for your state/province. A list is available on the ARRL website at http://www.arrl.org/section-abbreviations . If you aren't sure which section you're in, guess. It's only important that it be in the right state/province. DX stations: enter **DX**.
   If your log has both ARRL-SECTION: and LOCATION: tags, the log checking process will use whichever appears last. Please make sure whichever one appears last contains a valid section.
3. Frequency can be any frequency in the appropriate amateur band, including "placeholders" like 14000.
4. Please name your file {YOURCALL}.log. (ie: K4TCG.log)
